

## Always the optimum

for small-, medium- and high volume series

The two new product lines IMS.baseline and IMS.techline give you the freedom to use your imagination. Both lines are based on the modular system and allow an even better overview of the best economical and technical planetary gear solution tailored to your requirements. Along with them you will always get the optimum solution no matter if your needs are for small- and medium-sized series using the flexible IMS.baseline or for high-tech solutions in high volume series by the use of IMS.techline.

For both product lines the customer defines the specifications and IMS Gear generates the best possible standard solutions from the matching product line. The validation is then again made by the customer in the specific application. This assures the function of the application, saves time and money as well as:

- No development costs
- Low or no tooling costs
- No time loss or double expenditure during validation
- High flexibility up to series production level
- Permanent availability of all standard gear components
