

Our Claim. Our Promise.

Our skills, your benefits

Skills

Material mix

- Solid metal
- Solid plastic
- Metal-plastic mix

Motor connection

- Flange-mounting to all motors worldwide
- Design rating by IMS Gear

Quality philosophy

- Production facilities devised to suit market needs around the globe
- Standardized quality level

Information management

- All locations networked
- Standardized systems

Internationalism

- Sales and production in:
 - Europe
 - Americas
 - Asia

Volume scenario

- Small and medium volumes with IMS.baseline
- High-volume production runs with IMS.techline
- Specifically optimized solutions for Interbranch applications with IMS.SDline

Specialization

- Specializing in planetary gears
- No integrated system provider
- Exclusive focus on planetary gear development

Benefits

- + Noise optimization
- + Optimum price-performance ratio
- + Weight optimization

- + Optimum interface configuration
- + Free choice of motor

- + Production lines based on standardization
- + Suitable for duplication globally

- + Standardized global information flow
- + Information available everywhere and at all times

- + Closeness to customers
- + On-site service
- + Low exposure to exchange rate risk
- + Low transportation costs
- + High level of deadline flexibility

- + Optimum gear drive solutions for any volume scenario

- + Independence from motor manufacturers
- + Insider in the planetary gear technology sector
- + New developments can be adapted rapidly
- + Consistent further development of the modular system concept
